PHONE CONVERSATION RECORD

Project: I-39/USH 51/STH 29 West Interchange	Job No.: 1-089.127	Date: 1/28/03	By: C. Saxby
Call to: Dave Johnson - BOA Call from: Chris Saxby	Representing: WisDOT Bureau of Aeronautics	Time: 9:00 am	CC:

I called Dave to discuss the coordination required and potential effects the West Interchange would have on the Wausau Municipal Airport. Dave said that if nothing is located in the 100:1 airspace and nothing is over 200 feet tall as measured from the surrounding original ground that we are ok. If either of these criteria is violated we will have to submit a Federal Aviation Administration Form 7460, "Notice of Proposed Construction or Alteration". Dave said typically the proposed improvements do not violate this criteria but the contractors need to be aware because of crane operations. If their cranes violate the criteria the contractor will have to fill out and submit the Form 7460. This should be explained in the special provisions of the construction contracts.
